DEWEY WATERS LIMITED
HERITAGE WORKS, WINTERSTOKE ROAD, WESTON-SUPER-MARE BS24 9AN

OPERATING AND MAINTENANCE INSTRUCTIONS

LOW LINE INSULATED HOUSING SYSTEMS

Dewey Waters Limited low line housing systems are manufactured from polyester based glass reinforced plastic. As this a non-corrosive material in consequence the housings require no specific maintenance other than good housekeeping. They are resistant to the majority of airborne pollutants and are not subject to rust or rot. The insulation is encapsulated and is thereby protected from vermin attack.

It is therefore recommended that the housings are inspected periodically for any damage caused by outside forces and if desired the surfaces may be cleaned with a mild detergent.

Environmental Considerations – Disposal

At the end of their useful life the housing panels are not considered to be recyclable. They should therefore be disposed of in accordance with the local authority guidelines in force at the time.
